

History

CerInvest S.r.l. was established in the early beginning of 2000 in Faenza, the town of pottery and ceramics, with the main objective of offering services for the development and characterization of high tech materials with a particular emphasis on new high performance ceramics.

Thanks to its founder,

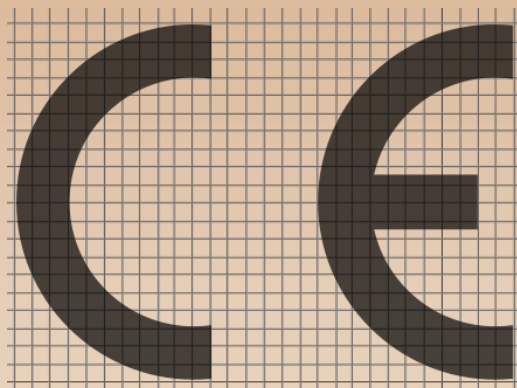

Dr. Gian Nicola Babini (Past Presidents of the European Ceramic Society and of the International Ceramic Federation), Cer.Invest S.r.l. has embraced new technologies, found new applications, extended its scopes with the intention of supplying not just products but complete, advanced solutions in ceramics and generally in construction products taking especially into account a sustainable approach reconciling economic, environmental and social aspects with each other.

Quality

Today Cer.Invest's network of international experts can offer a wide range of consulting services focused on the ceramic sector: from technical research, analysis, industrial processes to design solutions, marketing and communication assistance

We are covering many different aspects of the ceramic industry by providing customized solutions for big and small medium enterprises.

In addition, in 2010 we were officially recognized by the European Notified Body 0714 **ECO CERTIFICAZIONI S.p.A.** as Operative Unit for the management of the Directive CPD 86/109/CE and since then we have been developing and performing tests for the CE marking of several building materials (EN 14411; EN 12004; EN 711; EN 998) in collaboration with the laboratory CERTIMAC (Laboratory created by the Italian ISTECC-CNR and ENEA)

Our main partners:

Italian Ceramic Society
European Ceramic Society
CERTIMAC National Certification lab.
ECO CERTIFICAZIONI S.p.A.
I&C Technology Consulting Co. Ltd Luoyang
